Comput. Methods Appl. Mech. Engrg. 129 (1996) 419-420

**Computer methods
in applied
mechanics and
engineering**

Contents Volume 129

Volume 129, Nos. 1-2, 1 January 1996

Detrimental or serendipitous effect of human error on reliability of structures <i>I. Elishakoff and A.M. Hasofer</i>	1
Spectral collocation/domain decomposition method for viscoelastic flow simulations in model porous geometries <i>A. Souvaliotis and A.N. Beris</i>	9
Analytical solutions for transient diffusion problems in infinite media <i>C. Zhao and G.P. Steven</i>	29
Finite element method for free surface flow problems <i>M. Souli and J.P. Zolésio</i>	43
Steady-state nonlinear heat transfer in stiffened composite plates and shells by an exactly integrated facet triangular element <i>J. Argyris and L. Tenek</i>	53
Coupled plastic-damaged model <i>B. Luccioni, S. Oller and R. Danesi</i>	81
On the solution of an inverse scattering problem in one-dimensional acoustic media <i>E.M. Fernandez-Berdaguer and J.E. Santos</i>	91
A note on C^1 -curved finite element <i>G. Qing and L. Li</i>	107
Analysis of non-singular solutions of a mixed Navier-Stokes formulation <i>M. Farhloul and H. Manouzi</i>	115
Optimization of Space Station components using design code CometBoards <i>A.S. Gendy, S.N. Patnaik, D.A. Hopkins and L. Berke</i>	133
Modified ODE-solver for vibration of tube-in-tube structures <i>Q. Wang</i>	151
An adaptive Petrov-Galerkin formulation for the compressible Euler and Navier-Stokes equations <i>R.C. Almeida and A.C. Galeão</i>	157
Unified and mixed formulation of the 8-node hexahedral elements by assumed strain method <i>Y.Y. Zhu and S. Cescotto</i>	177
Announcement	211

Volume 129, No. 3, 15 January 1996

A boundary element approach to the 2D potential flow problem around airfoils with cusped trailing edge <i>A. Carabineanu</i>	213
A new approach for building bounded skew-upwind schemes <i>M. Darwish and F. Moukallad</i>	221
On the numerical treatment and analysis of finite deformation ductile single crystal plasticity <i>P. Steinmann and E. Stein</i>	235
Linearized Θ -methods: I. Ordinary differential equations <i>J.I. Ramos and C.M. García-López</i>	255
Coupling of two- and three-dimensional composite shell elements in linear and nonlinear applications <i>F. Gruttmann and W. Wagner</i>	271
Numerical solution of spectral stochastic finite element systems <i>R.G. Ghanem and R.M. Kruger</i>	289
Approximate method for a two-dimensional parabolic free boundary problem <i>A. Kharab</i>	305
Beam length and dynamic stiffness <i>Y.-H. Chen and J.-T. Sheu</i>	311

Volume 129, No. 4, February 1996

A sensitivity analysis for the optimal design of metal-forming processes <i>S. Badrinarayanan and N. Zabaras</i>	319
Superconvergent extraction of flux intensity factors and first derivatives from finite element solutions <i>B.A. Szabó and Z. Yosibash</i>	349
Sensitivity analysis for the dynamic response of thermoviscoplastic shells of revolution <i>M. Kulkarni and A.K. Noor</i>	371
Sensitivity analysis for large-deflection and postbuckling responses on distributed-memory computers <i>B.C. Watson and A.K. Noor</i>	393
